Explanatory note

The declaration form acts as the identification sheet for the work (production).

It <u>must</u> be signed by all author-directors mentioned in the form. The form is declaratory in nature only and concerns only those rights resulting from use of a work created by rights holders who are members of the Society or another society of authors that has given the Society a mandate to represent it.

The signatory/signatories confirms/confirm that appropriate contributions will be paid to cover the rights of public performance and mechanical reproduction arising from membership of societies of authors.

The signatory/signatories confirms/confirm that appropriate contributions will be paid to cover the rights of public performance and mechanical reproduction arising from membership of societies of authors.

Audiovisual productions broadcast on television channels and listed in the SACEM directory are categorised by the Board on the advice of the Programmes Committee, as suggested in Section 4, according to their potential originality and the level of the director's responsibility at the time of production and development. The elements contributing to this intellectual creation are assessed from the various stages of its development: conception, staging, filming, and post-production.

Coefficient 0.08:

Any works for which the involvement of the director was at the same time reduced, limited, mechanical and partial due to the structure and limiting means of the production and/or the repetitive character thereof.

Coefficient 0.30:

Any works for which the involvement of the director was limited due to time and technical constraints imposed by the production.

Coefficient 0.75:

Single works and/or concert recordings that have been the subject of treatment and imaging by the author-director, showing their command of the component parts comprising the creation.

Sketches or scripted sequences which required partial involvement of the author-director.

Coefficient 2:

Single works, concert recordings, works from collections, and sketches and/or sound sequences which have been the subject of the total involvement, singular treatment and specific imaging by the author-director.

Royalties for the public performance or mechanical reproduction rights collected by or on behalf of the Society are distributed to the authors and composers of the works, after overheads and statutory deductions, in accordance with the agreements made between them, it being understood that the share for author-directors is set at 20% for royalties not arising from payments from television and cable broadcasting networks.

This information is processed by Sacem (data controller) to perform its collective management tasks under the French Intellectual Property Code. It must be signed by all author-directors in case of co-direction; its sole purpose is for registration and applies solely to a share of the royalties from the exploitation of the work only for the benefit of rights holders who are members of the society or another society having given it a mandate to represent these rights.
